

Top 10 ways Electec delivers value throughout your building life-cycle

1. Reducing installation time

- Ultralx[®] premium armoured cables arrive on site ready to install.
- On site connections are plug-in – requiring no tools, no stripping, no terminations.

2. Supporting Fast-Tracking

- Plug-and-play connections accelerate project completion in time sensitive installations.

3. Protecting your investment

- Armoured cables deliver the mechanical protection of pipe with the flexibility to reuse and relocate.

4. Ensuring Built-in Quality

- All Electec components are 100% tested to rigorous standards prior to shipment.
- ‘Wire to terminal’ connections are integrally moulded to prevent separation due to mechanical vibrations.

5. Simplifying maintenance and re-dos of wire and cable plant

- Intuitive plug-and-play connections provide a swift solution for flex-environments.

6. Decreasing costly downtime

- Plug-and-play connections allow for immediate and cost-effective moves, adds, changes and removals.

7. Developing fully reusable and relocatable wiring

- Plug-and-play connections deliver safe and intuitive reusability and relocatability.

8. Lowering cost of ownership

- Electec Building Wiring Systems adapt to changing demands; maximizing the life span of your building wiring.

9. Protecting valuable equipment from corrosive cable jacket compounds

- Low-smoke, zero-halogen systems from Electec provide protection of life and equipment in the event of a fire compared to conventional wire and cable products.

10. Eliminating troublesome abandoned voice/data cabling

- EZ-Cabling[®] establishes an environmentally-responsible cabling infrastructure which results in decreased landfill waste, more reuseable connections and no costly and unsafe abandoned cable to remove.
